

FIRE SAFETY POLICY

It is Beta Healthcare's Policy to protect all its premises and personnel from hazards of fire by ensuring safe premises and systems.

Specifically, the company will ensure that:-

- It operates in accordance with statutory requirements.
- All personnel understand their responsibilities for fire safety within the company.
- The company will provide training of employees in fire safety.
- The company will provide fire warning systems, means of escape and firefighting equipment, with good housekeeping practice to minimize the risk of fire.
- The company will keep a system of assessing structural and other fire protection needs in the premises, determine fire priorities and the allocations of funds to complete agreed works, taking into account other established priorities.
- The company will provide appropriate storage facility for flammable materials and train employees in proper precautions while handling flammable materials.
